

Automation Engineer Proficiency Exercise:

Overview :

The purpose of this exercise is to assess the candidate automation developer's technical proficiency, coding knowledge and style. The exercise involves building a basic automation framework for web application. The exercise will be evaluated on coding style, understanding of programming concepts, choice of techniques and quality of the final product.

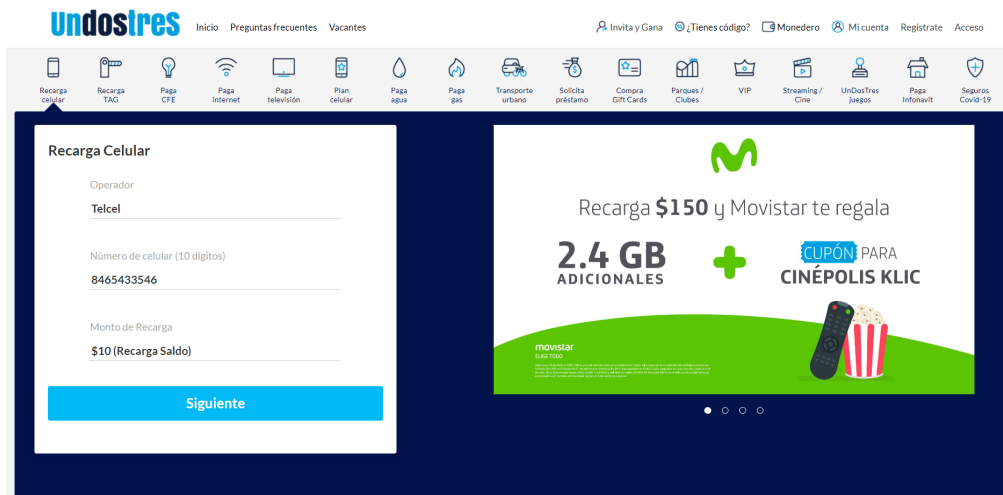

Specification :

- Create a basic automation framework which supports multiple browsers
- Automate Undostres web application using any of the automation tools(selenium preferable) in any of the programming languages.
- Go to <http://sanbox.undostres.com.mx> Under recarga celular select operator as Telcel from **Operador** field. Give this number 8465433546 under **Numero de celular** field and under **Monto de Recarga** select 10 dollar normal recharge and click on **siguiente**. Verify if the user is able to reach the next screen(Payment screen) or not.
- On payment screen click on **Tarjeta** enter the following details under "Usar nueva tarjeta": **Card number**:4111111111111111 ,**month**=11,**date**=25,**cvv**=111 and under **correo electronico** field give email id as test@test.com.
- Click on **Pagar con Tarjeta** to do the recharge
- A popup will appear. Enter the following email automationexcercise@test.com and password 123456
- Verify if the user gets a success message and recharge gets successful.

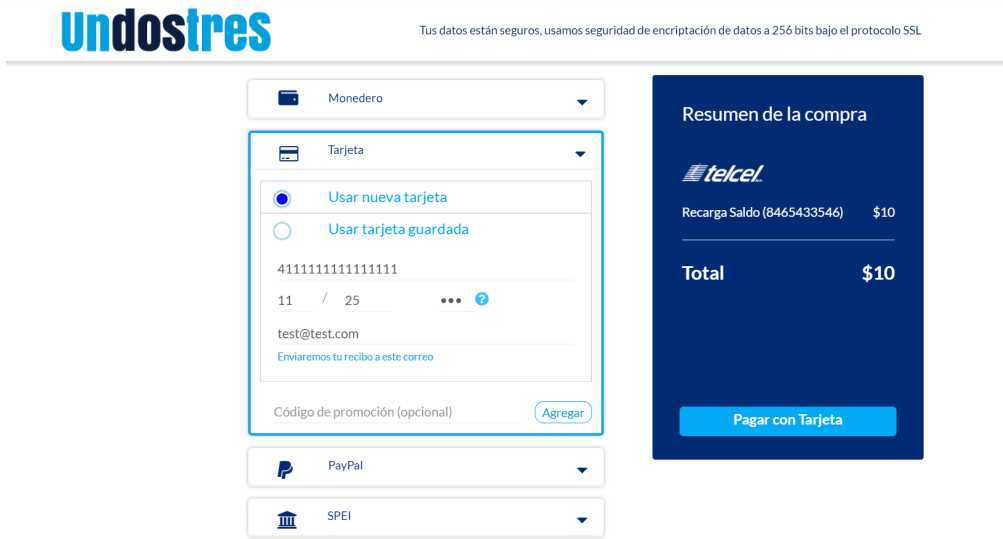

Additional Guidelines:

1. Comment your code where necessary.
2. Polish your code as much as possible - we expect professional, production quality code.
3. Feel free to use best coding practices .
4. Please commit your code on git and share the url.
